Pictographs

	Through bores 6-11, 18, 22-24		Parallel distances 11, 18, 22-24
	Deep bores 7, 10, 22-25		Bore depth 15
	Bores with a short breakthrough 6, 9, 12, 13, 18, 22-24		Internal taper length 15
	Blind bores 9, 12, 13, 18, 22-24		Inside chamfer 15
	Internal multi-splines 11		Outside chamfer on inquiry
	Internal gears 11		Roundness 6-11, 18, 22-24
	Bores in easily deformable materials 16, 17		Cylindricity 6, 8-10, 22-24
	Recessed grooves or bores 12, 13		Straightness of a bore on inquiry
	Internal grooves 12, 13		Concentricity 22-24, 28
	Internal grooves / special 12, 13		Coaxiality 28
	Undercuts 12, 13		True position of a bore to the X-Y coordinations on inquiry
	Outside diameter of a recessed section in a bore 25		Centre distance on inquiry on inquiry
	Inside diameter bore, having a centre obstruction 15, 25		Run-out on inquiry
	Bores with a central hub 15, 25		Internal taper 22-24
	Bores with an axial obstruction (cross holes) 18, 22-24		Shallow bores 18, 22-24
	Interrupted bores 18, 22-24		Center connection 25
	Spherical bores (socket) 6, 8, 12, 13, 18, 19		Circumference 16, 17
	Thread distance / groove width 15		Minor diameter of internal threads 17, 22-24
	Thickness 15		Major internal diameter of a ball screw on inquiry
	Internal key seating 22-24		Wall indentations in a bore 22-24
	Shaft grooves 22-24		Penetrating bores 6, 8, 22-24

Experience

Calibration service for all SCHWENK
measuring instruments

Production of high-stressed
technical springs

Planning / manufacturing / initiation
of measuring devices

Repair service for all
SCHWENK measuring instruments

Precision Solutions

Fast delivery of all
standard instruments

Spare parts delivery ex stock for all
serial measuring instruments

Precision in the µm range

Circumference measuring
from 20 mm to over 20.000 mm

Bore gauges from 1 mm
to over 1000 mm

Over 80 years experience in the field of metrology

Content

The company.

1921

since 1921

Today, Schwenk is one of the oldest long-established manufacturers of precision measuring instruments with production experience dating back over 80 years. The company's founder, Oskar Schwenk, developed and made the first SUBITO® as long ago as 1921. Since then, this product has become the embodiment and

the standard for a high-precision two-point-contact comparator bore gauge throughout the world.

In the decades that followed, Schwenk's employees developed and series-produced more and more types of internal precision instruments, so that further world-renowned brand names such as the OSIMESS split-ball probe measuring instrument, the mytast precision indicator and the OD plug gauge were added to the range.

Also in 1921 Oskar Schwenk began to produce a quite different product, the technical springs. In this field, Schwenk has specialized in high-quality springs for static to highly dynamic stresses and process wires from 0,4 to 7,0 mm diameter in medium to large quantities; mainly for the automotive industry.

The internationally outstanding quality of Schwenk products is assured by the employees' long experience and the use of modern production methods supplemented by an established internal quality assurance system. This is based on every single employee's responsibility for quality. They ensure that every individual component, whether for series or special measuring instruments, meets the strict Schwenk standards which in some cases are more demanding than international standards.

Machine hall.

Workers washing their hands.

Schwenk also offers a **repair service** and a **calibration service**, issuing inspection certificates in accordance with our demanding internal standards. Our test equipment is regularly checked on the basis of normative regulations and can be traced back to national quality standards. In the field of standard measuring instruments it is our aim, to carry a sufficient stock of current instruments at all times, as well

as the accompanying spare parts, so as to ensure speedy delivery.

Nowadays, Schwenk is the partner of choice when it comes to solving customer-specific measurement problems in bores, grooves and the like. Our designers and production engineers would be pleased to see how we can solve your measuring problems. In the past, we have had many opportunities of demonstrating our skills in the field of complete measuring device production.

SUBITO®-Precision Bore Measuring Instrument

for measuring internal diameters, application range
4,5 - 800 mm

SERIES 100-118

STANDARD VERSION

SERIES SU w. inspection certificate

Delivery: Holder, fixed measuring pins, washers, in wooden box, w/o dial gauge.

Movable contact pin as standard tungsten carbide.

Ruby Version: Measuring pins and contact pin ruby.

Version centring plate coated wear-resisting: standard with measuring pins tungsten carbide.

SHORT VERSION

SERIES SK w. inspection certificate

Delivery: as Series SU, but with a short holder.

ANGLED VERSION

SERIES SW

Delivery: as Series SU, but holder with a fixed angle piece.

SE

SERIES 130-133

SUBITO® SE for deep bores up to 12 m depth

SUBITO® Precision Bore Measuring Instruments

for measuring
deep bores

For the use with an electronic length measuring probe and indicating unit; measuring depths up to 12 m are possible.

A complete instrument consists of: meas. head, connecting tube (1000 mm) w. cardan joint, length measuring probe, extensions if necessary. Delivery in transportation box, w/o length measuring probe, w/o indicating unit.

SUBITO® Precision Bore Gauge

SL

for measuring bores w. boring
bar left in the workpiece

SERIES 150-154

Self-centring bore gauge for determining
bore diameters, for instance with boring
bar left in the workpiece.

Design: meas. instrument w. column (mm-
or inch-graduation) for pre-setting of the
diameter, in wooden box, w/o dial gauge.

Measuring travel limitation for OSIMESS holder w. retraction	629 00011

SERIES 629

Measuring stand OSM 5
with OSIMESS probe

Measuring stand OSM 6

Floating holder

Master setting rings

according to DIN 2250

Ideal for setting of OD plug gauges and of SUBITO meas. instruments. Setting rings made of hardened 62 HRC steel, according to DIN 2250. Tolerance of diameter is JS3. The rings are marked with their actual size (up to 1 µm).

MASTER SETTING RINGS

Setting rings Ø 1-20 mm see Series 625-628 OSIMESS	
Setting rings type C Ø 1 - 300 mm	
Setting rings type B - for pneumatic plug gauges	
Setting rings for tapers	on inquiry
Setting rings for toothings	
Setting rings more accurate than JS3	
Separate price list for master setting rings on inquiry.	

SERIES 129

Setting rings according to DIN 2250

Indicating Plug Gauge OD

for measuring internal diameters, application range
2,0 - 800 mm

Assembly complete set: 1 measuring sleeve with two radially movable contact pins, offset by 180° + OD holder (see page 23) + indicating unit of choice.

Standard meas. range: 0,2 mm for $\varnothing \geq 6$ mm

Standard design of the meas. sleeve: tool steel w. tungsten carbide meas. contacts

SERIES 300-326

Plug gauges OD for various bore diameters and in open design

SPECIAL DESIGNS

ON INQUIRY:

- with integrated inductive meas. probes, from Ø 25 mm
- Contact pins and/or sleeve out of Delrin for scratch sensible, polished workpieces
- Front distance "h" non-standard
- Meas. sleeves for automatic measuring
- Three-point design
- Contact pins ruby, ceramic, diamond or hardchromed
- Two or more measuring axes
- Special sleeves for plane parallel distances
- Special profiles for extruders or for housings of toothed wheel pumps
- Blind bores design with $h \leq 1$ mm
- Extended meas. range > 0,2 mm
- Taper measurement - see illustration

Technical details regarding the Series OD can be found in our technical documentation 300 T

Precision bore gauges

SBO / SBU

for measuring internal and external diameters, for bores around a hub / with boring bar left in the workpiece, for centring shoulders, flanges etc.

SERIES 155

Manufactured individually to measure a definite bore diameter around a hub (SBO) or around a boring bar (SBU) or similar; the alignment of the instrument requires the support on the bottom of the bore or on a plane surface. High measuring accuracy, high measuring certainty. Delivery w/o dial gauge.

ORDER DATA SBO / SBU

- Bore diameter with tolerance D
- Diameter and height of the hubboring bar d
- Measuring depth MT
- Distance of the meas. axis to the bore bottom - front distance h
- Drawing of workpiece and / or workpiece

Precision bore gauge SBO

Inspection Certificates
for SCHWENK measuring
instruments see p.32

Internal Chamfer Gauge IFM

for direct measuring the major diameter of internal chamfers and tapers

Delivery: Holder with integrated 90° or 127° taper and special ratio dial gauge with reading 0,01 mm for indication of measuring result. The gauge is preset.

taper 60° on inquiry

SERIES 194

Internal Chamfer Gauges IFM

Precision Indicator mytast

for internal measuring instruments of all series

Precision indicator according to DIN 879, ball bearing guided tracer rod, shockproof, 7 jewel movement, measuring force 1 N, adjustable tolerance markings, clamping shaft Ø 8 h6, with contact point 16 mm. Delivery in plastic box.

MYTAST/CENTITAST

Type	Reading [mm]	Range [mm]	Art.-No.	Model
<i>Mytast</i>	0,001	0,1	610 00000	Standard
<i>Mytast</i>	0,001	0,1	610 00012	Splash-proof (IP54)

<i>Centitast</i>	0,01	0,5	611 00000	Standard
<i>Centitast</i>	0,01	0,5	611 00011	Splash-proof (IP54)

Deviating measuring force and contact points on inquiry

SERIES 610-611

Mytast

Centitast

ACCESSORIES

Designation	Art.-No.
Angle piece 90° range s = 1,5 mm	610 00011
Shaft extension 90 mm*	610 00014
Release cable	610 00052

* only available together with a precision indicator

Mechanical Dial Gauges

for internal measuring instruments of all series

Design according to DIN 878, clamping shaft Ø 8 h6, delivery in plastic box.

DIAL GAUGE

Reading [mm]	Housing Ø [mm]	Range [mm]	Art.-No.
0,01	58	10,0	600 00000
0,01	40	3,0	600 00001
0,001	58	1,0	600 00002
0,001	40	1,0	600 00003

SERIES 600

Dial gauges, housing-Ø 58 mm and 40 mm

Digital Dial Gauges

for internal measuring instruments of all series

DIGITAL DIAL GAUGE

Series	Range [mm]	Resolution [mm]	Art.-No.
209	12,5	0,01	613 00010
209	12,5	0,001	613 00011
213	12,5	0,001	613 00012

Data transfer cable and larger measuring ranges on inquiry

SERIES 613

Digital dial gauge

Features:

- clamping shaft Ø 8 h6
- LCD digital display, height of digits 8,5 mm
- Data output: RS232 with optic coupling
- Housing aluminium, Display turnable 270°
- Power supply on lithium battery CR 2032;
- Battery life up to 4000 h

Series 213 additionally:

- Min/Max/Delta storage
- Selection and display of tolerance limits
- Preset value recall
- Change of measuring direction
- Selection of resolution
- Half duplex transmission

Functions:

- Zeroing
- Selection mm/inch
- Hold function
- Data transfer
- REF I / REF II
- Preset, Preset value

Linear stroke ball bearing

for easy backlash-free linear movements

LINEAR STROKE BALL BEARING

Designation	Art.-No.
Ball bearing traveller with clamping shaft Ø 8 h6, with contact point 6 mm and 16 mm, with bellows, travel b = 3 mm	614 00000

SERIES 614

Ball bearing traveller

Coax-mandrels

for measuring alignment errors between two related bores

COAX-MANDREL

Fixed design for a determined bore matching;
Enquiry/order data: drawing or/and workpiece.

K F

SERIES 999

Plug gauges

for measuring positional deviation of a bore in relation to the reference

PLUG GAUGE FOR POSITIONAL DEVIATION

- For determining the centre deviation of a bore (for instance in a motor block or a gear housing) compared to a reference bore in a control wall
- Centring is obtained by the guide shank with a h3-fit
- Probe heads with wedge or segment bypass
- Vertical or horizontal arrangement of the dial gauge; delivery w. dial gauge

K S

Coax measuring instrument with workpiece

SERIES 999

Plug gauge for positional deviation

Precision measuring instruments

K M

for measuring diameters, roundness and course

Internal precision measuring instrument, with highest precision (< 1 µm), since the electronic probe is directly integrated in the measuring axis; for determining diameters from 90 mm and checking roundness and course; runners ensure self-alignment and centring. Delivery w/o. electronic probes. Prices on inquiry.

SERIES KM

Type	Application range [mm]	Meas. range [mm]
KM 140	90 - 140	I
KM 200	140 - 200	I
KM 320	200 - 320	I

SERIES 999

Measuring instrument with runners KM

Measuring instrument test device

for checking one-axial
length measuring instruments

MPV

TEST DEVICE

	Art.-No.
Measuring instrument test device MPV, for checking:	
- internal 2-point-contact comparison gauges (for instance SUBITO, OD, OSIMESS, etc...)	
- dial gauges	650 00000
- precision indicators	
for deviation, repeatability, hysteresis	

DELIVERY

- main stand	
- 2 setting units with a built-in micrometer screw	
- angle piece with clamping lug	
- adjustable anvil	
- adapter for various measuring sleeves connection threads	
Recording of the measured values for different distance sensors	
Software Tastkal for recording of the measured values according to DIN 878/879 or with free arrangeable runs with graphic diagram and record	on request
Complete system for fully automatic checking	

Reference unit

RV

Reference unit for setting
of one-axial length
measuring instruments

- Setting of 2-point-contact comparison gauges
- Setting of any intermediate dimensions, by which the linearity errors of the measuring instrument can be minimised
- Setting of wide length - setting rings or master blocks with long delivery time, high purchase costs and regular checking costs are not needed any more
- Use in the quality control, in the standards room and by the processing machine
- Linearity and hysteresis checking of 2-point-contact internal gauges
- Possibility of compensation in the indicating unit
- Integrated Heidenhain incremental measuring system

REFERENCE UNIT RV

Type	Setting range [mm]	Accuracy with compensation	Art.-No.
RV 270	0 - 270	< 1µm to 100 mm < 2µm to 270 mm	125 00500
RV 520	0 - 520	< 1µm to 100 mm < 2µm to 270 mm < 3µm to 520 mm	125 00501
RV 1020	0 - 1020	< 1µm to 100 mm < 2µm to 270 mm < 3µm to 520 mm < 5µm to 1020 mm	125 00502

SERIES 650

MPV complete system

SERIES 999

Reference unit RV

Tungsten carbide precision balls

Extremely wear-resisting
and non-corroding

SERIES 680

Applications: Measuring instruments, gauges, calibration tools, high-pressure valves, colour squirt devices, ball point pens, aerospace.

Material: sintered metal

(94% WC and 6% Co)

Hardness: HV 1550 ± 50

Precision: Grade 25

Ruby precision balls

resistant to high temperatures,
with very low weight, acid-resisting
and good sliding quality

Applications: measuring instruments, contact balls for dial gauges, aerospace, chemical and nuclear industry

Material: aluminium-oxide

Hardness: Knoop 2000

Precision: Grade 25

SERIES 680

Ruby precision balls

Ceramic precision balls

resistant to high temperatures,
insensitive to abrasion and
aggressive media

Applications: measuring instruments,
valves, flowmeters, chemical and nuclear
industry

Material: aluminium-oxide

Hardness: Knoop 2000

Precision: Grade 25

SERIES 680

Ceramic precision balls

Special measuring inserts

according to customer
configuration

for:

- dial gauges, precision indicators
- electronic probes
- measuring machines
- measuring devices
- manufactured according to specifications

SERIES 680

Special measuring inserts

Precision steel rulers

for fast and accurate length-measuring

SERIES 620

Precision steel rulers

Steel rulers made of stainless steel.

Broad design with double laser marked scaling, in mm.

Mat surface for better reading.

High precision. Width 30 mm.

PRECISION STEEL RULERS

Inspection certificates

for SCHWENK
measuring instruments

SERIES 699

MANUFACTURER INSPECTION CERTIFICATES ACCORDING TO DIN 55350-18-4.2

Checking for repeatability, hysteresis and deviation (for comparator measuring instruments w/o dial gauge clamped in) at several measuring points, as well as visual and functional checking.

FOR MEASURING INSTRUMENTS

Description	Art.-No.
<i>SUBITO precision bore measuring instruments Series SU, SK, SV, SS, SP, KT and SCA up to SU 50 - 150 included</i>	699 00176
<i>SUBITO precision bore measuring instruments Series SU, SK, SV, SS, SP, KT and SCA, from SU 100 - 160 as well as SMT, SW, SE, SN, ST, SL</i>	699 00193
<i>OSIMESS split-ball probe OS, OSH, OSS up to probe 4,0 included</i>	699 00194
<i>OSIMESS split-ball probe OS, OSH, OSS from probe 4,5</i>	699 00178
<i>Precision indicator mylast / centitast according to DIN 879 part 1</i>	699 00179
<i>Dial gauge with 10 mm travel according to DIN 878</i>	699 00185
<i>Plug gauges OD up to Ø 200 mm</i>	699 00180
<i>Groove measuring instruments ON</i>	699 00181

INSPECTION CERTIFICATES ACCORDING TO DIN 55350-18-4.3

FOR SETTING RINGS

Description	Art.-No.
<i>Setting rings according to DIN 2250 and OSIMESS setting rings according to works standard, checking in 1 level; for Ø 0,5 - 1,4 mm</i>	699 00195
<i>Setting rings according to DIN 2250 and OSIMESS setting rings according to works standard, checking in 3 levels; from Ø 1,75 mm</i>	699 00209

INSPECTION CERTIFICATE FOR MEAS. ANVILS ESU

MEAS. ANVILS ESU

Description	Art.-No.
<i>Pair of meas. anvils for setting device ESU, Checking for evenness deviation and the mean surface roughness</i>	699 00187

Inspection certificates

for SCHWENK
measuring instruments

SERIES 699

QUALITY INSPECTION CERTIFICATES FOR MEAS. TAPES ACCORDING TO DIN 55350-18-4.1.2

FOR MEASURING TAPES

Description	Art.-No.
Outside circumference measuring tape C-tape CJU 950 and CJU 2200 and CJL up to 2200	Checking of 1 scale (Ø or circumference) at several measuring points
Outside circumference measuring tape CJU 950 and CJU 2200	Checking of both scales at several measuring points
Inside and outside circumference measuring tape CJU 3460 and IUB and CJL from 3500	Checking of 1 scale (Ø or circumference) at several measuring points
Inside and outside circumference measuring tape CJU 3460 and IUB	Checking of both scales at several measuring points
Contour measuring instrument Novometer	Checking of the diameter at several measuring points

QUALITY INSPECTION CERTIFICATES FOR SCALES ACCORDING TO DIN 865 OR 866

SCALES

Description	Art.-No.
Checking scales, work scales, like e.g. rulers, steel scales, tape measures	699 00196
For lengths up to 1.200 mm	
Checking scales, work scales, like e.g. rulers, steel scales, tape measures	699 00197
For lengths from 1.200 mm	

For all calibration tasks, the traceability to
the national standards is ensured. This is
shown in each certificate.

02/2011
GENERAL TERMS AND CONDITIONS OF DELIVERY

A. General

- (1) Our terms and conditions of sale shall apply exclusively; contradictory terms and conditions of Customer or ones deviating from our terms and conditions of sale shall only be acknowledged if we expressly approve their validity in writing. Our terms and conditions of sale shall apply even if we supply to Customer without reservations despite knowledge of Customer's contradictors or deviating terms and conditions.
- (2) All agreements made between ourselves and Customer for the purpose of performance of the present contract have been recorded in writing in the present contract.
- (3) Our terms and conditions of sale shall only apply towards enterprises within the meaning of § 310, sub-section 1, German Civil Code.

B. Quotation, acceptance, contents of contract

- (1) To the extent that our quotations have not been limited, they shall always be subject to change without notice or without obligation for us. The foundation of the contract and the decisive thing for the scope of the delivery shall be our written order confirmations. This shall also apply if Customer has demanded provision of a specific quotation.
- (2) In the event of quotations with a time limitation and a set acceptance period, the quotation shall be decisive if no order confirmation is provided in good time. Side-agreements and amendments must be confirmed by us in writing.
- (3) Constructional changes as well as other changes of technical data and performance features shall be reserved to the extent that they contain technical improvements and can be reasonably expected.
- (4) The documents enclosed with the requests for a quotation or the order such as diagrams, samples and similar provided to Oskar Schwenk GmbH & Co. KG shall remain Customer's property. These shall be the binding foundation of the quotation by Oskar Schwenk GmbH & Co. KG. Customer shall make written reference to all subsequent amendments compared with the first request and the quotation from Oskar Schwenk GmbH & Co. KG when placing an order. To the extent that Oskar Schwenk GmbH & Co. KG encloses similar documents of the aforementioned nature with the quotations, these shall be and remain property of Oskar Schwenk GmbH & Co. KG. Customer engages not to use, reproduce these documents for purposes outside the contract or to make them accessible to third parties. Obvious errors, printing, counting, spelling and calculation errors shall not be binding for Oskar Schwenk GmbH & Co. KG and shall not give Customer any claim to damages.

C. Prices, payment

- (1) The prices shall be understood ex works in Euro, exclusive of packaging plus the value added tax valid on the day of delivery. The prices valid on the day of ordering in accordance with our price list shall be charged.
- (2) Small amount surcharge: the value of small orders is disproportionate to the administrative costs. Further details can be seen from our current price list.
- (3) To the extent not agreed to the contrary, our payment terms shall be:
 - 2% discount within 10 days from the invoice date
 - net within 30 days from the invoice date.This shall also apply to part deliveries. Repairs shall be paid net, i.e. without deduction of discount, as a matter of principle.
Payment shall only be deemed made when the amount has been credited to our account. In the event of the use of cheques, payments shall only be deemed made when the cheques have been honoured.
- (4) Retention of payments or offset on account of all and any counterclaims shall only be admissible with undisputed, acknowledged or legally effective counter-claims of Customer.

D. Delivery time, impossibility, arrears

- (1) The delivery period shall commence on the date of the order confirmation. However, this shall only apply if all technical and commercial details have been clarified at said time.
- (2) Compliance with our duty to deliver shall further presuppose punctual and proper performance of Customer's obligation. The defence of unperformed contract shall remain reserved.
The delivery time shall result from the contracting parties' agreements. Compliance by Oskar Schwenk GmbH & Co. KG shall presuppose that all commercial and technical questions have been clarified between the contracting parties and Customer has fulfilled all the obligations incumbent on it, such as obtaining the necessary official certifications or approvals or provision of a down-payment. If this is not the case, the delivery period shall be extended suitably. This shall not apply to the extent that Oskar Schwenk GmbH & Co. KG is answerable for the delay.
- (3) Compliance with the delivery period shall be subject to correct and punctual delivery to Oskar Schwenk GmbH & Co. KG. Foreseeable delays shall be notified by Oskar Schwenk GmbH & Co. KG without delay.
- (4) The delivery period shall be deemed complied with if the object of delivery has left the Oskar Schwenk GmbH & Co. KG works in Fellbach or readiness for dispatch has been notified by its expiry. To the extent that acceptance is necessary, the acceptance date shall be decisive, alternatively the report of readiness for dispatch - except in cases of justified rejection of acceptance.
- (5) If dispatch or acceptance of the object of delivery are delayed for reasons for which Customer is answerable, the costs caused as a result of the delay shall be charged to it, starting one month after the notification of readiness for dispatch or acceptance, as the case may be.
- (6) If failure to comply with the delivery period is to be put down to force majeure, industrial disputes or other incidents outside the sphere of influence of Oskar Schwenk GmbH & Co. KG, the delivery period shall be extended accordingly. Oskar Schwenk GmbH & Co. KG shall notify Customer of the start and end of such circumstances as soon as possible.
- (7) Customer can withdraw from the contract without setting a period if overall performance becomes impossible for Oskar Schwenk GmbH & Co. KG before the passage of risk. Over and above this, Customer can withdraw from the contract if performance of a part of the delivery becomes impossible for an order and it has a justified interest in rejection of the part delivery. If this is not the case, Customer shall pay the contractual price due for the part delivery. The same shall apply in the event of inability of Oskar Schwenk GmbH & Co. KG. H, M and N shall apply apart from this.
- (8) If Customer falls into arrears in acceptance and culpably breaches other cooperation duties, we shall be entitled to demand indemnification of the damage suffered by us to this extent, including all and any additional expenditure. Further-reaching claims or rights shall be reserved.
- (9) To the extent that the prerequisites of sub-section (4) have been fulfilled, the risk of chance destruction or chance deterioration of the object of purchase shall pass to Customer at the time at which the latter has fallen into arrears in acceptance or payment.

E. Passage of risk

- (1) Risk shall pass to Customer when the object of delivery has left the works in Fellbach, even if part deliveries are made or Oskar Schwenk GmbH & Co. KG has taken on further services, e.g. the costs of dispatch or delivery and erection. To the extent that acceptance is necessary, it shall be decisive for the passage of risk. It must take place without delay on the acceptance date, alternatively following the report of readiness for acceptance by Oskar Schwenk GmbH & Co. KG. Customer may not reject acceptance if an inconsiderable defect exists.
- (2) If dispatch or acceptance is delayed or does not take place as a result of circumstances not to be ascribed to Oskar Schwenk GmbH & Co. KG, risk shall pass to Customer from the day of the report of readiness for dispatch or acceptance, as the case may be. Oskar Schwenk GmbH & Co. KG

engages to conclude the insurances requested by Customer at the latter's expense.

(3) Part deliveries shall be admissible to the extent that the deliveries are divisible and part deliveries can reasonable be expected of Customer.

(4) To the extent requested by Customer, we shall cover the delivery by transport insurance; the costs incurred to this extent shall be borne by Customer.

F. Packing

Packing shall be charged by us at cost. In the case of free delivery to us, take-back on request.

G. Retention of title

- (1) The commodities supplied shall remain our property until complete payment of all present and future claims from the business relationship with Customer, regardless of the reason. In the event of breach of contract by Customer, in particular in arrears in payment, we shall be entitled to take the supplied object back. A petition for opening of insolvency proceedings shall entitle Oskar Schwenk GmbH & Co. KG to withdraw from the contract and to demand immediate return of the object of purchase. Taking back the object of purchase by Oskar Schwenk GmbH & Co. KG shall represent withdrawal from the contract. Following a return of the object of purchase, Oskar Schwenk GmbH & Co. KG shall be entitled to exploit it, the yield from the exploitation being offset against Customer's liabilities following deduction of suitable costs of exploitation.
- (2) In the event of seizures or other interventions by third parties, Customer shall notify us in writing without delay, so that we can initiate proceedings pursuant to § 771, Code of Civil Proceedings. To the extent that the third party is not in a position to reimburse us for the judicial and extrajudicial costs of proceedings pursuant to § 771, Code of Civil Proceedings, Customer shall be liable for the damage suffered by us.
- (3) Customer shall revocably be entitled to resale of the object supplied within the framework of ordinary business operations. Customer here and now assigns all claims accruing to it against its customers or third parties from the resale to us to the amount of the final invoice value (incl. VAT) of our claim. The assigned claims shall serve to secure all claims pursuant to sub-section 1. Customer shall be obliged to notify the assignment to third parties for the purpose of payment to us and to give us the information and provide us with the documents necessary for us to claim our rights.

H. Claims from defects

- (1) Customer's claims from defects shall presuppose that it has properly complied with the duties to examination and notification incumbent on it pursuant to § 377, German Commercial Code.
- (2) To the extent that a defect in the object of purchase exists, the statutory regulations shall apply.

I. Return of goods

In principle, goods which have definitely been sold and delivered in the proper manner will not be taken back. Exceptions can only be made in special cases, following prior discussion. Returns shall be sent free of charge. The products must be individually and well packed. Reworking which is required because of defective packing or for other reasons shall be charged at cost.

J. Sample consignments / returns

Samples shall be charged for. Goods may only be taken back after agreement. We make an administrative charge of 10 % of the value of the goods, but Euro 10.00 minimum, for returns for which we are not responsible (e.g. incorrect order).

K. Costs of tools

To the extent not agreed to the contrary, tools produced for the performance of the order shall remain our property in all cases, even if a share of the tool costs is charged separately to Customer.

L. Special productions

Special productions shall require binding information in a written form on finish, quantity etc. when ordered. Amendments or deletions shall be possible one week after confirmation date at the latest. Thereafter, alterations or deletions shall only be possible if the costs incurred are charged. Taking back of special productions has been ruled out.

M. Liability

- (1) To the extent that Customer makes claims to damages based on malice aforethought or gross negligence, including malice aforethought or gross negligence of our representatives or vicarious agents, we shall be liable according to the statutory directives. To the extent that no deliberate breach of contract can be ascribed to us, the liability for damages shall be limited to the foreseeable damage typically occurring.
- (2) If the object of delivery cannot be used contractually by Customer through the culpability of Oskar Schwenk GmbH & Co. KG, the regulations according to M, N shall be applied, ruling out further claims by Customer.
- (3) Apart from this, we shall assume no liability for damage occurring for the following reasons: unsuitable and improper use or storage, defective assembly by Customer or third parties, high-handed attempts at repairs and amendments, natural wear and tear, defective or negligent treatment etc., on which we have no influence, and also in cases of improper use and failure to comply with our operating instructions.
- (4) To the extent not regulated to the contrary above, liability has been ruled out. Cogent law shall remain unaffected.
- (5) The period of barring for claims from defects shall be based on the statutory periods, starting from the passage of risk.
- (6) In the event of recourse for delivery, the period of barring shall be based on the statutory directives.

N. Joint and several liability

- (1) A further-reaching liability for damages than provided for in M has been ruled out without regard for the legal nature of the claims being made.
- (2) To the extent that liability for damages towards us has been ruled out or limited, this shall also apply with a view to the personal liability for damages of our employees, workers, fellow-workers, representatives and vicarious agents.

O. Data protection

We inform our business partners that we process their personal data with the help of electronic data processing for business purposes in accordance with the directives of the Federal Data Protection Act.

P. Place of jurisdiction

- (1) Insofar as Customer is a merchant, our registered office, 70736 Fellbach, Esslinger Strasse 84, shall be the place of jurisdiction; however, we shall be entitled to sue Customer at its registered office as well.
- (2) The law of the Federal Republic of Germany shall apply; validity of UN purchase law has been ruled out.
- (3) To the extent that nothing to the contrary results from the order confirmation, our registered office shall be the place of jurisdiction.

Precision compression springs for static up to highly dynamic stresses (approx. wire-Ø 0,4 - 7,00 mm)

1. Made of oil tempered (valve-) spring wire in accordance with EN 270-2,

alloyed and unalloyed alternatively

- surface defect testing on a random basis
- surface defect testing at 100%
- with shaved surface and with 100% surface

2. Made of unalloyed spring steel wire in accordance with EN 270-1,

for springs with low up to

high static as well as medium dynamic stresses e.g. for tools, machine

constructions and for the constructions of jigs and fixtures,

3. Made of stainless spring steel wire in accordance with EN 270-3,

for special springs which are used in a corrosive environment

for springs with medium up to high dynamic stresses like e.g. valve springs, damper springs or clutch springs.

Special treatments:

Shoot-peening:

Surface hardening to increase the fatigue strength for dynamic stresses

Cold-/Hot-Setting:

To improve the relaxation characteristics

Chamfering of the spring ends:

E.g. to reduce the wear or to ensure an easy assembly

Marking:

E.g. for identification or to avoid confusions.
